

YOU CAN'T SEE IT, SMELL IT OR TASTE IT, BUT **RADON** GAS MAY BE IN YOUR HOME.

PROTECT YOUR FAMILY WITH A FREE RADON TEST KIT FROM THE FLORIDA DEPARTMENT OF HEALTH

Radon is the second leading cause of lung cancer overall and is the leading cause among non-smokers. It's a radioactive carcinogen that's colorless, odorless and tasteless. In Florida, one in five homes tested has elevated radon levels above the limits set by the Environmental Protection Agency (EPA). Elevated radon levels have been found in all types of Florida buildings: homes, schools, offices and high-rise condominiums.

Radon comes from the radioactive breakdown of naturally occurring radium found in most Florida soils, rocks and groundwater. As a gas, it becomes trapped and concentrated after entering a building through small openings in the foundation or from building materials.

Testing for radon is the only reliable way to find out if there are elevated levels in your home. It's easy and you can do the test yourself. Best of all, by using this coupon, it's absolutely free!

If the test determines that you have high concentrations of radon gas in your home, the problem can be fixed by installing a proper mitigation system in your home which costs about the same as any other common repair.
